

PrEventing and Combating
onLine and offline hate
speech and dIsinformation
through multidisciPlinary
innovation, education, and
awareneSs in Europe

Project Background

The ECLIPSE project aims to prevent and counter hate speech and mis/disinformation both online and offline across Europe. By integrating advanced technologies with insights from social, behavioural, criminological, and legal sciences, the project collaborates with Law Enforcement Authorities (LEAs), Civil Society Organisations (CSOs), and international organisations to analyse harmful and false content online. It deploys counter-narratives via Natural Language Processing (NLP), Social Network Analysis (SNA), and Natural Language Generation (NLG) technologies to support practical interventions in real-world contexts.

ECLIPSE also employs AR/XR gamification for training, addressing societal impacts, enhancing security, and delivering policy recommendations. Its ultimate goal is to raise awareness among European citizens and promote the adoption and scalability of its solutions at national, EU, and international levels.

Project Objectives

EQUIP LEAs, CSOs, and international organisations with modern and validated digital and non-digital tools, methods, and curricula to effectively address hate speech and mis/disinformation online and offline.

DEVELOP standardised European approaches for LEAs, CSOs, and international organisations to collect data on hate speech and fake news, analyse risks, and implement counter-narratives and security measures.

ENHANCE citizens' security perceptions and prevent hate speech and mis/disinformation online and offline through training materials, workshops, and events using digital storytelling, gamification, and AR/XR.

PROVIDE targeted recommendations and communicate key outcomes through policy briefs for European and national policymakers to effectively counter hate speech and mis/disinformation online and offline.

RAISE awareness among key stakeholders through innovative tools and training methods, and communicate project outcomes through effective communication and dissemination activities.
